Harmon C. McAllister, Ph.D.
Research Director
Council for Tobacco Research - USA, Inc.
900 Third Avenue
New York, NY 10022

Dear Dr. McAllister:

The 1990 Deuel Conference on Lipids has been set for March 7-9, 1990 in San Diego, California.

The program is being organized by Dr. John D. Brunzell of the University of Washington, with the following tentative proposed topics:

1. Apolipoprotein determinants of plasma cholesterol levels.
2. Lipoprotein arterial cell wall interactions.
3. Characterization of lipoprotein receptors
4. Free cholesterol, phosphotidyl inositol, and other lipids as regulators of function.
5. Clinical hyperlipidemia.

The Deuel Conference maintains an informal atmosphere, encourages free and open discussions by all attendees, and is a forum for presentation of new and unpublished data in rapidly developing new fields of research. A copy of brief background information on the Deuel Conference is enclosed for your information and also a copy of last year's program.

The Deuel Conference is supported by donations from companies such as your own, and we are therefore again soliciting your financial support. Because of the limitations on the conference size, it is necessary to restrict supporting organizations to one representative at the round table at a minimum donation of $2,000 and we are soliciting only those who have supported us in the immediate

past. We hope that you continue to be interested in sending a representative to the conference. If this is indeed the case, we would be delighted. Please contact me as soon as possible with the name and address of the attendee as well as your contribution to the Deuel Conference and I will forward that information to Dr. Havel's office and to Dr. Brunzell's office. In order for us to plan accordingly, an immediate reply is most desirable, with definite commitment by November 1, 1989 at the very latest.

We hope to hear from you in the near future and to see you or your representative next March.

Sincerely,

Edwin L. Bierman, M.D.
Funding Chairperson
